

Question 1:

Working with s3 buckets

#created a bucket as assignment1lu

Amazon S3

Buckets (1)

Buckets are containers for data stored in S3. [Learn more](#)

Find buckets by name

Name	AWS Region	Access	Creation date
assignment1lu	US East (Ohio) us-east-2	Bucket and objects not public	February 25, 2021, 23:11:11 (UTC+05:30)

© 2008 - 2021, Amazon Internet Services Private Ltd. or its affiliates. All rights reserved. [Privacy Policy](#) [Terms of Use](#) [Cookie preferences](#)

Add the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDK or Amazon S3 REST API. [Learn more](#)

Drag and drop files and folders you want to upload here, or choose **Add files**, or **Add folders**.

Files and folders (1 Total, 105.4 KB)

All files and folders in this table will be uploaded.

Find by name

Name	Folder	Type	Size
Assignment 1.pdf	-	application/pdf	105.4 KB

Support

1. Choose AMI

2. Choose Instance Type

3. Configure Instance

4. Add Storage

5. Add Tags

6. Configure Security Group

7. Review

Step 2: Choose an Instance Type

Amazon EC2 provides a wide selection of instance types optimized to fit different use cases. Instances are virtual servers that can run applications. They have varying combinations of CPU, memory, storage, and networking capacity, and give you the flexibility to choose the appropriate mix of resources for your applications. [Learn more](#) about instance types and how they can meet your computing needs.

Filter by: All instance families Current generation Show/Hide Columns

Currently selected: t2.micro (- ECUs, 1 vCPUs, 2.5 GHz, -, 1 GiB memory, EBS only)

	Family	Type	vCPUs	Memory (GiB)	Instance Storage (GB)	EBS-Optimized Available	Network Performance	IPv6 Support
<input type="checkbox"/>	t2	t2.nano	1	0.5	EBS only	-	Low to Moderate	Yes
<input checked="" type="checkbox"/>	t2	t2.micro Free tier eligible	1	1	EBS only	-	Low to Moderate	Yes
<input type="checkbox"/>	t2	t2.small	1	2	EBS only	-	Low to Moderate	Yes
<input type="checkbox"/>	t2	t2.medium	2	4	EBS only	-	Low to Moderate	Yes

Step 6: Configure Security Group

A security group is a set of firewall rules that control the traffic for your instance. On this page, you can add rules to allow specific traffic to reach your instance. For example, if you want to set up a web server and allow Internet traffic to reach your instance, add rules that allow unrestricted access to the HTTP and HTTPS ports. You can create a new security group or select from an existing one below.

[Learn more](#) about Amazon EC2 security groups.

Assign a security group:

Create a new security group

Select an existing security group

Security group name:

launch-wizard-1

Description:

launch-wizard-1 created 2021-02-25T21:27:26.306+05:30

Type	Protocol	Port Range	Source	Description
All traffic	All	0 - 65535	Anywhere	0.0.0.0/0, ::/0
e.g. SSH for Admin Desktop				

Add Rule

Warning

Rules with source of 0.0.0.0/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

Select an existing key pair or create a new key pair

A key pair consists of a **public key** that AWS stores, and a **private key file** that you store. Together, they allow you to connect to your instance securely. For Windows AMIs, the private key file is required to obtain the password used to log into your instance. For Linux AMIs, the private key file allows you to securely SSH into your instance.

Note: The selected key pair will be added to the set of keys authorized for this instance. Learn more about [removing existing key pairs from a public AMI](#).

Create a new key pair

Key pair name

Cassy

Download Key Pair

You have to download the **private key file** (*.pem file) before you can continue. **Store it in a secure and accessible location.** You will not be able to download the file again after it's created.

#the instance passed the 2/2 checks

The screenshot shows the AWS Management Console interface. On the left is a navigation menu with options like 'EC2 Dashboard', 'Events', 'Tags', 'Limits', and 'Instances'. The main area is titled 'Instances (1)' and contains a table with one instance: i-022dc7c5b61b26f4a. The instance is in the 'Running' state, has a status check of '2/2 checks passed', and no alarms. Below the table, there is a prompt to 'Select an instance above'.

Name	Instance ID	Instance state	Instance type	Status check	Alarm status	Availability Zone
-	i-022dc7c5b61b26f4a	Running	t2.micro	2/2 checks passed	No alarms	us-east-2

The screenshot shows the detailed 'Instance summary' for the instance i-022dc7c5b61b26f4a. The instance is in the 'Running' state. The summary includes the following information:

- Instance ID:** i-022dc7c5b61b26f4a
- Instance state:** Running
- Instance type:** t2.micro
- AWS Compute Optimizer finding:** Opt-in to AWS Compute Optimizer for recommendations. [Learn more](#)
